

We are delighted to invite you to the **16th World Congress on Controversies in Neurology** CONy to be held virtually in March 24-27,2022.

CONy provides a much-needed forum to illuminate contested areas in neurology and in treatment of neurological diseases. While most conferences are naturally informative, there is often only limited time for thorough and critical discussions, particularly on still unresolved issues.

CONy provides a platform for international experts to discuss and compare experience, thus closing the gap between the expansion of knowledge and its dissemination and use. By having this debate style structure, the congress has become a major annual event for members of the neurological community and its allies.

All our participants are encouraged to take an active role in the Congress by engaging faculty members in an open and unique environment and voting on debates in each session. Abstracts for presentations are also welcome and will be discussed by our faculty.

We do hope you will join us for this high-level educational Congress.

We look forward to welcoming you for CONy 2022!

With best wishes,

Amos D. Korczyn, Israel
President

Natan M. Bornstein, Israel
Co-Chair

Anthony Schapira, UK
Co-Chair
